

The **WOW!** Show and Intimate Impossibilities

Suggested Room Layout

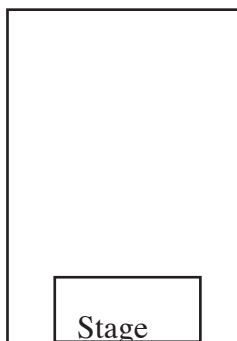

This is the “perfect world” room layout for the Wow! Show and the Intimate Impossibilities show (note that steps and raised platform are not necessary for audiences under 100). These are the best conditions for a blockbuster show. The key features:

- 1.) The performing area is situated in the middle of the longest wall, everyone feels close to the action.
- 2.) There are no tables behind or to the side of the performance area, everyone can see clearly.
- 3.) There are clear paths between the tables for guests to move while getting to the performance area, and stairs for easy access.

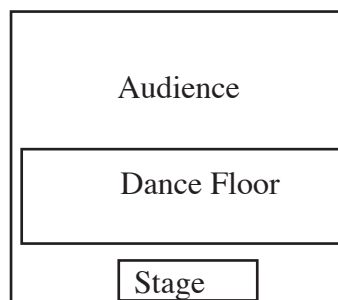

Please avoid tall centerpieces: these act like miniature skyscrapers to make it very difficult for guests to enjoy the show.

I greatly appreciate your efforts. The better the performing conditions, the greater the return on your investment in your guests’ experience!

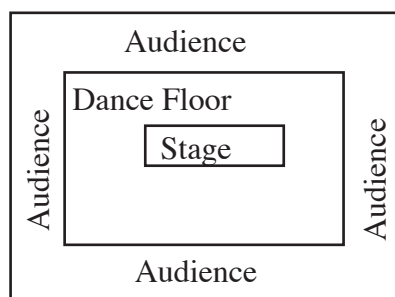

Things to avoid: if humanly possible:

Stage on skinny side of rectangular room: makes those in back feel like they are not a part of the show

Dance Floor between audience and performer,: makes it **extremely difficult** for performer to connect with and engage guests

Performance in center of dance floor: half of audience feels ignored at any moment. Some material must be cut from the show.
